Professional Summary

✓ Final-year Computing Science student at Thompson Rivers University with 4+ years of coding experience.

✓ Proficient in Python, Java, JavaScript, and tools such as Power BI, AWS, and Android Studio.

✓ Experienced in developing web applications, mobile apps, and interactive data visualizations.

✓ Demonstrated leadership in academic and personal projects, delivering user-centric and innovative solutions.

✓ Strong problem-solving skills, attention to detail, and expertise in UI/UX design and software development.

Skills

Programming Languages: Python, Java, C#, C, PHP

Frontend Development: HTML, CSS, JavaScript, jQuery

Databases: SQL (MySQL), Firebase

Cloud & Tools: AWS, Power BI, Android Studio

UI/UX & Design Tools: Figma, UI/UX Principles

Other Skills: Data Visualization, Data Analysis, Network Security, Software Architecture

Soft Skills: Leadership, Team Collaboration, Strong Communication, Detail-Oriented, Time Management

Projects

✓ **IMDB Rating Analysis (GitHub ⧉)**

- **Tools/Technologies:** Python, Power BI
- Conducted data analysis on IMDB movie datasets to identify trends and insights.
- Designed and developed interactive dashboards using Power BI to visualize key metrics for stakeholders.

✓ **FlixHub – Movie Rating Website (GitHub ⧉)**

- **Tools/Technologies:** HTML, CSS, JavaScript, PHP, SQL, jQuery
- Developed a fully functional movie rating website.
- Designed a user-friendly interface for rating, reviewing, and exploring movies.

✓ **FitBod – Fitness Application UI/UX**

- **Tools/Technologies:** Figma, UI/UX Principles
- Led a team of three to design a comprehensive fitness application.
- Conducted qualitative and quantitative user research to gather requirements.
- Created a detailed user interface and user experience design prototype using Figma.

✓ **K'Cart – Software Development Project**

- **Tools/Technologies:** Software Design Principles, Test Plans

- Led a full-cycle software development project, gathering functional and non-functional requirements.

- Developed and implemented test plans to ensure code quality and functionality.

✓ **EventSphere – Mobile App for Event Management (GitHub ⧉)**

- **Tools/Technologies:** Android Studio, Java, Firebase

- Built an Android application for managing events with intuitive UI and seamless functionality.

- Integrated Firebase for real-time event updates and user authentication.

✓ **Stippled Images – Artificial Intelligence Project (GitHub ⧉)**

- **Tools/Technologies:** Python, Basic AI Concepts

- Developed an AI algorithm to create stippled image effects.

- Focused on enhancing artistic image rendering through advanced computational techniques.

Professional Experience

Cash Lead, *Old Navy*   2022 Jul – present
                                                                                    Kamloops, Canada
